NSA surveillance exposed by Edward Snowden (2013)

NSA Prism program taps in to user data of Apple, Google and others

- Top-secret Prism program claims direct access to servers of firms including Google, Apple and Facebook
- Companies deny any knowledge of program in operation since 2007
- Obama orders US to draw up overseas target list for cyber-attacks

☞ A slide depicting the top-secret PRISM program.

This isn't just a government story — it's a corporate one, too.
